

TRADESETUP

Disclaimer: It is important to acknowledge that the results shown are hypothetical and based on the ASX share price movement. The results do not take into account available trading volume, possible price slippage for trade entries or exits and transaction costs. There is no guarantee as to the success of future trade alerts. Please note that past performance results are in no way an assurance of future performance and it is recommended that investors seek their own independent professional advice. The following table lists our trade alert price for each share that touched that price point from November 14th, 2015 to September 13th 2017. We then list our alert exit and the potential return.

As at	13/09/17	<i>Model \$100K account</i>	<i>\$10K Position Size</i>	Model Result	\$73,185.62	73.19%	<i>Including Open positions</i>
